T2S EXTERNAL NETWORKS

HOSTING TERMS AND CONDITIONS

- Attachment 3 to the Licence Agreement -

1 Objective

In line with the Technical Requirements listed in the Attachment 1 of the Licence Agreement, the NSP is responsible for the external connectivity between Directly Connected T2S Actors and the T2S Platform. Therefore, the NSP will install the needed communication lines and network components for routing and encryption of the T2S related traffic in the primary and secondary T2S Sites in the two Regions. The T2S Sites are hosted by Banca d' Italia ("**BdI**") and Deutsche Bundesbank ("**BBk**") for the Eurosystem.

2 Preparation of Installation of Components

The NSP will provide to the Eurosystem a written list of all the components with all their needs in respect of space, power, climatic resources etc. which are necessary for the provision of the Connectivity Services and which will be installed in each data centre. The Eurosystem will provide the necessary space, power, climatic resources etc. for the installation of the components in the T2S Sites. The NSP will provide such a list at the latest [thirty (30) Business Days] before the installation of any devices at the T2S Sites to allow BdI and BBk sufficient time to prepare the T2S Sites in accordance with the description laid down in the said note.

The NSP and the Eurosystem will agree on the organizational details of the installation of the components at each data centre on the basis of the list of components.

3 Provision and Installation of Components

3.1 Provision of Components

The NSP will provide the necessary components for the NSP's Solution for T2S Connectivity as detailed in the List of Components to the Eurosystem. The components will be provided at the data centres located at:

- Banca d'Italia [concrete location of primary site; concrete reserved area]
- Banca d'Italia [concrete location of secondary site; concrete reserved area]
- Deutsche Bundesbank [concrete location of primary site; concrete reserved area]
- Deutsche Bundesbank [concrete location of secondary site; concrete reserved area]

3.2 Installation of Components

The NSP will install the devices in the specific areas in the data centres at the T2S Sites where BdI's and BBk's own equipment is also in use as agreed between BdI / BBk and the Eurosystem. The NSP will perform the installation and setup of all necessary components and devices in its sole responsibility.

The connection to power supply and climatic control as well as the connection to the T2S internal network will be based on conditions already in place at each data centre and used for BdI and BBk components. The NSP shall verify and declare the suitability of these conditions for the installation and use of the components installed by the NSP for the provision of the Connectivity Services.

4 Access to and Use of the Components

The NSP shall use remote access to its components installed on the T2S Sites. Physical access by the NSP's staff to the NSP's components on the Eurosystem's premises will be limited to the extent absolutely necessary. As far as physical access is necessary, it will be granted by the Eurosystem's on the basis of, and in accordance with the rules of access in place at each data centre. The NSP will be provided with these rules upon the installation of the components at the T2S Sites and declares to acknowledge these rules.

Structural alterations within the BdI and BBk premises for the installation of the NSP's components which are necessary for the provision of the Connectivity Services will be limited to the extent absolutely necessary for the installation and use of the components. If such structural alteration will be necessary, the NSP shall request the Eurosystem's consent to such alteration. The NSP shall bear the costs for such alteration, including any costs for returning the structure of the respective data centres to the original state upon the termination or expiration of the Licence Agreement and / or these Hosting Terms and Conditions.

5 Liability

The hosting of the NSP's equipment and components as specified above shall not be considered as a contract of safekeeping (*Verwahrung*). The Eurosystem or the Eurosystem Central Bank hosting the NSP's equipment and components shall not have any obligation to safeguard, maintain or insure the NSP's equipment or any other obligation with regard to the NSP's equipment which is not expressly provided for in these Hosting Terms and Conditions or otherwise agreed by the Eurosystem and the NSP.

6 Responsible contact persons for the relevant data center addresses

5.1 Notices to BdI

Issues related to the data centres of 'BdI shall be addressed to:

[Banca d'Italia

Mr. Andrea Amici – Mr Fabrizio Lucarini

email: [■]

phone: [■]

5.2 Notices to BBk

Issues related to the data centres of BBk shall be addressed to:

Deutsche Bundesbank

IT51 - Mr. Hans-Joachim Bock
