1) Other changes consist of revaluations due to price and exchange rate changes, as well as statistical reclassifications.

2) Annual growth rates are calculated on the basis of transactions, i.e. from an index of notional stocks which is obtained (starting from a base period) by dividing transactions by the outstanding amounts at the beginning of the period to which they refer. For further details see the technical notes to sections 2.1 to 2.6 of the Statistics Bulletin (available from the ECB's Statistical Data Warehouse).
