Notes:

- *At the beginning of this year euro area investment fund statistics started to include data on German closed-end funds. These funds' data are available as of reference period September 2015 and amount to €81 billion at the end of 2016. Most of these funds are categorised as real estate and other funds.*
- *Euro area-wide reporting under Regulation ECB/2013/38 of 18 October 2013 concerning statistics on the assets and liabilities of investment funds, also taking into account other changes to the statistical reporting framework and practices in several euro area countries, starting from the December 2014 reference period.*
- *Money market funds are presented separately in this press release since they are classified in the monetary financial institutions sector within the European statistical framework. Data for money market funds are collected under Regulation ECB/2013/33 concerning the balance sheet of the monetary financial institutions sector.*
- *Further predefined tables, statistical data including data at a monthly frequency, methodological notes, as well as the advance release calendar, are available in the 'Statistics' section of the ECB's website under [Investment fund statistics](#) and [The balance sheets of monetary financial institutions](#).*

1) Other changes consist of revaluations due to price and exchange rate changes, as well as statistical reclassifications.

2) Annual growth rates are calculated on the basis of transactions, i.e. from an index of notional stocks which is obtained (starting from a base period) by dividing transactions by the outstanding amounts at the beginning of the period to which they refer. For further details see the technical notes to sections 2.1 to 2.6 of the Statistics Bulletin (available from the ECB's Statistical Data Warehouse).
